MITIGATE EXPOSURE THROUGH A CAPTIVE PLAN WITH RISK SOLUTIONS CAPTIVE

Hendersonville, TN (July 17th, 2014): Bill Beeler, President of Risk Solutions Captive, Inc. (RSC), was recently featured on the radio program *Inside Healthcare: Critical Thinking for Turbulent Times*. Beeler and the host of the show, Robert Chamberlain, discussed how American businesses today have different options related to their healthcare, specifically in the self-funding arena, one of which is the new captive product offered by Risk Solutions Captive.

Beeler explains, "Employers have become more aware of the health benefits they provide to their employees because of the mandated benefits that are part of the act (The Affordable Care Act) as well as the penalties and fines associated for employers that do not provide the minimum benefits as well as the affordable benefits. This has made employers pay more attention to their plan, want more information about their plan, and try to find out what drives the cost of their plan. Until now they have not had this information. All they've had from a carrier is a set of rates and a premium increase. Those days have come to an end...Employers want more knowledge. They want more data that they can act upon."

Partnering with Health Cost Solutions and a highly-rated reinsurance carrier, Risk Solutions Captive provides employers and benefit consultants with ACA compliant options designed specifically for their employees.

"Risk Solutions Captive is basically an insurance company; we have our certificate of authority in the State of Tennessee, we market to employers with 50 employees and above, down to 25 if they have a favorable population, and we allow those groups to participate in our captive, RSC, but we also set up a separate captive cell for that employer group below RSC and they're responsible for a portion of the risk on the front end. Anything over a certain dollar amount cedes to RSC and then over a certain dollar amount it goes to the reinsurance carrier. It allows those employers to get into the self-funded environment and not experience those peaks and valleys of a self-funded plan," Beeler said.
